## **Peach Fuzz: soft, warm and comforting**

A new year brings not only fresh perspectives but also a new colour to impact our design world. The prestigious Pantone Color Institute has chosen a shade for 2024 which touches and soothes our senses with a delicate warmth: Peach Fuzz (13-1023).

### **A velvety peach tone**

This new trend colour is a velvety peach tone, comprising a balanced blend of white, yellow and red, which radiates harmony, calmness and peace of mind. The name 'Peach Fuzz' is inspired by the smooth, soft skin of a ripe peach. Just like previous Colors of the Year, Peach Fuzz radiates a bubbly optimism and its sunny character makes you think it is spring – whatever the time of year.

**It all hinges on excellence.**

### **Peach Fuzz in interior design**

Whether in a living room, workspace or the kitchen, Peach Fuzz has a unique capacity to lift the mood and bring rooms to life. Its pleasant warmth brings tranquillity into every space and creates a cosy and intimate atmosphere. Peach Fuzz works particularly well with neutral tones such as white, grey and beige, enfolding them in its gentle embrace.

Light blue shades are also a particularly good match with this friendly colour, while natural materials, such as a light wood, create an aesthetic balance between softness and structure. Peach Fuzz as a colour sits in the range of powder shades and can therefore also be used as a principal colour in many different interior spaces to create surroundings full of vitality. Details can also be picked out in Peach Fuzz to create coloured accents and give design concepts a stylish flourish with its light touch and freshness.

**It all hinges on excellence.**

### **Bold use of colour with SIMONSWERK**

SIMONSWERK offers a range of surface finishes, from matt black to bronze to allow door hinges to colour-match a particular design concept. Door hinges in white are the best option for rooms highlighting the new trend colour Peach Fuzz. They emphasise the positive vibrancy of the peach tone while exhibiting masterful restraint. Even stainless steel hinges coordinate perfectly with Peach Fuzz as they have a timeless quality, allowing them to generate real impact with the trend colour.

### **Apricot and Limitless**

Our new colours Apricot and Limitless also fit perfectly in the powder shades palette and skilfully create stylish accents with their warm aura. Of course, our hinge systems are available to order in Peach Fuzz as SIMONSWERK will produce any hinge in your colour of preference.
